solutions and support		
<b>Programmer II</b>		
Analyzes functional business applications and design specifications for functional activities. Translates detailed design into computer software. Tests, debugs and refines the computer software to product the required product. Prepares required documentation, including both program level and user-level documentation. Enhances software to reduce operating time or improve efficiency. Provides technical direction to programmers to ensure program deadlines are met.	\$66.74	Bachelors in Computer Science/Engineering and a minimum of 4 years experience.
<b>Sr. Software Engineer</b>		
Analyzes and studies complex system requirements. Designs software tools and subsystems to support software programs and manages their implementation. Manages software development and support. Estimates software development costs and schedule. Review's existing programs and assists in making refinements, reducing operating time and improving current techniques. Supervises software configuration management	\$107.66	Masters in Computer Science/Engineering
<b>Systems/Network Engineer (CNE/MCSE)</b>		
Supervises and manages the daily activities of configuration and operation of business systems which may be mainframe, mini or client/server based. Optimizes system operation and resource utilization and performs systems capacity analysis and planning. Provides assistance to users in accessing and using business systems.	\$97.88	Masters in Computer Science/Engineering. Certification as a Network Engineer (CNE) or Microsoft Network Engineer (MSNE) required.
<b>Network Technician</b>		
Conducts site surveys; assesses and documents current site network configuration and user requirements. Designs and optimizes network capabilities. Analyzes existing requirements and prepares specifications for hardware acquisitions. Prepares and performs configuration changes at each site and testing of each	\$52.16	Bachelors in Computer Science/Engineering. Experience in installation and analysis of computer based systems, local area networks and fiber optic cable

configuration. Configures computers, communications devices and peripheral equipment. Installs network hardware.		
<b>Software Support Specialist</b>		
Assists in the design and development of a comprehensive documentation suite. Development of software user guides and installation scripts. Participates in composing of program level documentation. Performs professional and complex technical work associated with the installation and support of computer software	\$52.16	Bachelors in Computer Science/Engineering. Experience with customer service and good communication skills
<b>Computer Specialist I</b>		
Analyzes and Develops information systems possessing a wide range of capabilities, including numerous engineering, business and records management functions. Develop plans for automated information systems from project inception to conclusion. Analyzes user interface, workloads and propose system modifications. Defines problems and develops requirements and program specification from which detailed flow charts, programs and test can be developed. Work closely with Specialist II and the Programmers to ensure proper implementation of product design and system specifications. Develop with the users systems alternative solutions.	\$42.41	Bachelors in Computer Science with experience in analysis and design of business applications and complete systems to include current storage and retrieval methods. Demonstrate the ability to solving system problems
<b>Computer Specialist II</b>		
Study and analyze complete information system requirements. Design solutions and manage their implementation. Manage information systems development. Provide technical direction for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards and for progress in accordance with schedules. Make recommendations, if needed, for approval of major systems installations	\$55.46	Bachelors in Computer Science with experience in design of business applications and complete information programs and/or systems.
<b>Project Leader</b>		
Manages the workflow of all documents/records received including the supervision of employee and quality control of all work prior to submission to the client. Trains employees who prepare, scan and input data into the	\$55.46	Bachelors Degree or a minimum of 7 years appropriate experience managing production projects.

database. Coordinates production with the Contract Manager to ensure milestones and timelines are met		
<b>Sr. Imaging Engineer</b>		
Study and analyze document management program requirements. Implementation/creating of the program to facilitate the customers' requirements to include software development, testing and implementation. Training on use of individually created program. Quality control checks on final output.	\$107.66	Master's Degree in Computer Science/Engineering. Experience in document imaging procedures.
<b>Document Conversion clerk (Scanning and Document Prep.)</b>		
Prepares all incoming records and documents to include removing of staple, paperclips, sorting and placing of document dividers. Use of individual scanners to large industrial scanners, from flatbed to 40 ppm. Maintaining and servicing of the scanners to include acquisition of replacement parts. Validating of all documents that have been scanned into the database to include data entry and revivification of documents	\$31.61	High School Diploma and experience in data entry and scanning
<b>Imaging Design/Systems Engineer</b>		
Under general supervision, defines and executes the systems engineering activities within a given project, which may consist of systems planning, performance management, capacity planning, testing, validating, information engineering and development of specific imaging design/systems performance and flexibility.	\$68.51	Bachelors Degree in Computer Science/Engineering and 3 years general experience in the field of computer science.
<b>Database Design Specialist (Oracle, SQL 6,5, access, Fox Pro)</b>		
Developing databases for large data acquisition, storage and retrieval requirements. Develop data base solutions that satisfy the need for high-speed access, multiple views of the same information, accuracy, security and the sharing of information between systems	\$68.51	Master's Degree in Computer Science or related field. Minimum of 5 years of network and/or database administration.
<b>Web Site/Graphics Designer</b>		
Create, produce and maintain WebPages utilizing current information, to include development of website content by designing/creating the general outlay of the website using	\$42.41	Bachelors in Web Design or related multimedia field or a minimum of 3
