Develops new hardware requirements and prepares specifications for hardware acquisitions. Configure computers and peripheral equipment. Ensures that problems have been properly identified and solutions will satisfy the user's requirements.	\$48.91	High School Diploma with college classes in computer science and a minimum of 4 years experience
Hardware Installation Technician		
Review computer systems in terms of machine capabilities and man-machine interface. Prepares studies concerning hardware performance, capabilities and upgrades. Prepares functional requirements and specifications for hardware acquisitions.	\$32.63	High School Diploma with 2 years experience
Training Specialist		
Conducts the research necessary to develop and revise training courses. Prepares instructor materials to include course outline, background material and training aids. Prepares student materials to include course manuals, workbooks, handouts, completion certificates and course critique forms. Trains personnel by conduction formal classroom courses, workshops and seminars.	\$52.16	High School Diploma with college classes in computer science and or/education. A minimum of two years training experience
Sr. Training Specialist		
Conducts the research necessary to develop and revise training courses and prepares appropriate training catalogs. Develops all instructor materials to include course outline, background material and training aids. Develops all student materials to include course manuals, workbooks, handouts, completion certificates and course critique forms. Train personnel by conducting formal classroom courses, workshops, seminars, and/or computer based/computer aided training. Provide daily supervision and direction to staff	\$60.19	Bachelors in Computer Science/Education. A minimum of four years training and previous supervisor experience
Technical Writer		
Preparation of technical documentation including researching for applicable government and industry documentation standards. Assists in collection information required for preparation of user manuals, training materials, installation guides, proposals and reports.	\$44.14	Bachelors in English, literature or other related discipline. A minimum of two years previous experience
Workflow Process Engineer		
Daily contact with customers, consulting on the effective use of digital printing systems, the operation of hardware in a digital workflow and the high-quality output of a digital printing system. Strong focus on customer	\$94.61	Bachelors in Computer Science/Engineering. A minimum of 4 years experience with digital printing systems and workflow solutions

solutions and support		
Programmer I		
Assists with the analysis of information requirements. Aids in the evaluation of problems with workflow, organization and planning and helps develop appropriate corrective action. Participates in the design of software tools and subsystems to support reuse and domain analysis. Assist other programmers and engineers to interpret software requirements and design specific code, integrate and test software components	\$48.94	Bachelors in Computer Science/Engineering. A minimum of 3 years experience.
Programmer II		
Analyzes functional business applications and design specifications for functional activities. Translates detailed design into computer software. Tests, debugs and refines the computer software to product the required product. Prepares required documentation, including both program level and user-level documentation. Enhances software to reduce operating time or improve efficiency. Provides technical direction to programmers to ensure program deadlines are met.	\$66.74	Bachelors in Computer Science/Engineering and a minimum of 4 years experience.
Sr. Software Engineer		
Analyzes and studies complex system requirements. Designs software tools and subsystems to support software programs and manages their implementation. Manages software development and support. Estimates software development costs and schedule. Review's existing programs and assists in making refinements, reducing operating time and improving current techniques. Supervises software configuration management	\$107.66	Masters in Computer Science/Engineering
Systems/Network Engineer (CNE/MCSE)		
Supervises and manages the daily activities of configuration and operation of business systems which may be mainframe, mini or client/server based. Optimizes system operation and resource utilization and performs systems capacity analysis and planning. Provides assistance to users in accessing and using business systems.	\$97.88	Masters in Computer Science/Engineering. Certification as a Network Engineer (CNE) or Microsoft Network Engineer (MSNE) required.
Network Technician		
Conducts site surveys; assesses and documents current site network configuration and user requirements. Designs and optimizes network capabilities. Analyzes existing requirements and prepares specifications for hardware acquisitions. Prepares and performs configuration changes at each site and testing of each configuration. Configures computers, communications devices and peripheral equipment. Installs network hardware.	\$52.16	Bachelors in Computer Science/Engineering. Experience in installation and analysis of computer based systems, local area networks and fiber optic cable
Software Support Specialist		
Assists in the design and development of a comprehensive documentation suite. Development of software user guides and installation scripts. Participates in composing of program level documentation. Performs professional and complex technical work associated with the installation and support of computer software	\$52.16	Bachelors in Computer Science/Engineering. Experience with customer service and good communication skills
Computer Specialist I		
Analyzes and Develops information systems possessing a wide range of capabilities, including numerous engineering, business and records management functions. Develop plans for automated information systems from project inception to conclusion. Analyzes user interface, workloads and propose system modifications. Defines problems and develops requirements and program	\$42.41	Bachelors in Computer Science with experience in analysis and design of business applications and complete systems to include current storage and retrieval methods. Demonstrate the ability to solving system problems

specification from which detailed flow charts, programs and test can be developed. Work closely with Specialist II and the Programmers to ensure proper implementation of product design and system specifications. Develop with the users systems alternative solutions.		
Computer Specialist II		
Study and analyze complete information system requirements. Design solutions and manage their implementation. Manage information systems development. Provide technical direction for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards and for progress in accordance with schedules. Make recommendations, if needed, for approval of major systems installations	\$55.46	Bachelors in Computer Science with experience in design of business applications and complete information programs and/or systems.
Project Leader		
Manages the workflow of all documents/records received including the supervision of employee and quality control of all work prior to submission to the client. Trains employees who prepare, scan and input data into the database. Coordinates production with the Contract Manager to ensure milestones and timelines are met	\$55.46	Bachelors Degree or a minimum of 7 years appropriate experience managing production projects.
Contracts Manager		
Serves as the contact for the client in preparation of contract to include any questions or concerns. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising personnel, communicating policies, procedures, goals and responsible for the overall contract performance	\$65.25	Master's Degree in Computer Science/Engineering. Experience in project development from inception to deployment.
Sr. Imaging Engineer		
Study and analyze document management program requirements. Implementation/creating of the program to facilitate the customers' requirements to include software development, testing and implementation. Training on use of individually created program. Quality control checks on final output.	\$107.66	Master's Degree in Computer Science/Engineering. Experience in document imaging procedures.
Document Conversion clerk (Scanning and Document Prep.)		
Prepares all incoming records and documents to include removing of staple, paperclips, sorting and placing of document dividers. Use of individual scanners to large industrial scanners, from flatbed to 40 ppm. Maintaining and servicing of the scanners to include acquisition of replacement parts. Validating of all documents that have been scanned into the database to include data entry and revivification of documents	\$31.61	High School Diploma and experience in data entry and scanning
Imaging Design/Systems Engineer		
Under general supervision, defines and executes the systems engineering activities within a given project, which may consist of systems planning, performance management, capacity planning, testing, validating, information engineering and development of specific imaging design/systems performance and flexibility.	\$68.51	Bachelors Degree in Computer Science/Engineering and 3 years general experience in the field of computer science.
Integration Specialist – Microsoft		
Analyzes end-user computing requirements. Assist in the designs, evaluation, building and enhancing computing delivery systems hardware and software components. Integrates delivery systems, ensures production readiness Supports problem systems to final resolutions.	\$52.16	Bachelors Degree in Computer Science and 2 years experience in network administration and database administration.
Database Design Specialist (Oracle, SQL 6,5, access, Fox Pro)		
Developing databases for large data acquisition, storage and retrieval requirements. Develop data base solutions	\$68.51	Master's Degree in Computer Science or related field. Minimum of 5 years of

that satisfy the need for high-speed access, multiple views of the same information, accuracy, security and the sharing of information between systems		network and/or database administration.
Web Site/Graphics Designer		
Create, produce and maintain WebPages utilizing current information, to include development of website content by designing/creating the general outlay of the website using various media available for illustrations, animations and word content.
