DS Retriever™

Product Screenshot

Brief Description

The DS Retriever Module allows users to capture documents, folders, and collections in DocuShare 3.X for the purpose of archiving for future search and retrieval.

Full Description The DS Retriever Module provides a simple method to capture documents, folders, and entire collections in DocuShare for the purpose of archiving the documents for future search and retrieval. The basic product provides the ability to search DocuShare for documents to be archived based on given specific criteria.

DS Retriever™ has the ability to archive DocuShare files to a hard drive, based on search criteria leaving a "pointer" specifying the path of the archive for quick reference. Store all metadata of documents in a database for offline reference.
