

Product Name

Edge Guard™

Product Screenshot

Brief Description

Edge Guard allows any computer-based document to be digitally signed from the desktop. Edge Guard is fully integrated with Microsoft Office applications, providing advanced, easy-to-use software-based signing and easy to use encryption facilities.

Full Description

Edge Guard is the next generation PKI aware E-Sign compliant (EU and US Legislation) product that enables organizations and individuals to control and manage the distribution and exchange of sensitive, confidential and valuable digital information, both persistently and securely.

Edge Guard includes Edge Guard Desktop Manager, Microsoft Office Add-ins and Windows Desktop Add-ins. Edge Guard Desktop Manager provides a centralized access to all the features of Edge Guard using a unified user interface. It contains easy to use Wizards and components for signing, encryption, compression, archiving and administration. Office Add-ins provides a mechanism to allow you access the full functionality of Edge Guard from within Microsoft Word and Excel applications.

Windows Desktop Add-ins provides a mechanism to allow you access the full functionality of Edge Guard from your Windows environment. In addition, the add-ins also allows you to view the Edge Guard related properties of a signed or encrypted document.
