

Product Name

EdgeXP™

Product Screenshot

Brief Description

Edge XP™ is a Microsoft Windows low cost application that manages the capture, classification, storage and retrieval of paper and digital documents, and over 50 other formats. EdgeXP™ has received the *Designed for Microsoft® Windows® XP and Windows® 2000 Logo* designation.

Full Description

Edge XP™ features a single screen GUI to provide a simple to use display, which does not require extensive training. Rapidly business demands for a robust product like Edge XP to manage files and records which are easy to understand yet complex enough to meet the most stringent and growing demands for records availability and accountability is growing.

Edge XP™ provides built in interfaces to popular workflow and web based collaboration products such as Microsoft's Sharepoint and our J2EE EdgeVault product. Edge XP™ is designed as a turnkey product delivered with a ready to run Microsoft Access Database to offer document capture and indexing, file management and workflow with many other features. The product was designed to provide features and functionality on a 32-bit platform to replace the products that will not meet the requirements of new technology.

Features like OLE, ODMA, ODBC and Open Architecture capabilities, makes Edge XP™ an open, but secure product that can be fully integrated with the following products: Kofax Accent Capture 3.x, 4.x, and 5.x, Oracle Database Products, Microsoft SQL versions 6.5 and up, Xerox DocuShare, Xerox Document Centers with Scanning Module, Edge Workflow™, iManage, EdgeVault™ and Microsoft Sharepoint .
