

Product Name

Edge PDF Plus™

Product Screenshot

Brief Description

The Edge PDFPlus™ Module provides a quick, efficient and cost-effective solution for producing and releasing Group IV Tiff documents in Adobe™ compliant PDF Image Only and PDF Hidden Text files from any Kofax Ascent™ 6.x system. Requires Kofax Ascent Capture 6.0.

Full Description

Edge PDFPlus™ allows you to create PDF Image Only files during the release process and release the images to a file system following the basic guidelines used in the Kofax Text Release Script. If the Kofax OCR queue is implemented, Edge PDFPlus™ allows the creation of image PDFs with ASCII data that can be indexed and searched by commodity text search engines or any other regular text search, as opposed to only specialized PDF search filters, while still working with specialized indexers. The Edge PDFPlus™ Module is configured through the Kofax release setup utility provided in the Administration area in Kofax Ascent Capture.
